PROFESSIONAL SUMMARY

Backend Software Engineer with 3+ years of experience designing, securing and deploying production REST APIs in Java/Spring Boot and C#/.NET for web and mobile platforms. Specializes in JWT-secured services and relational data layers (MySQL, PostgreSQL), including Hibernate query tuning that cut average API response time by about 30%. Accelerates delivery with Docker and CI/CD, reducing deployment time from about 10 to 2 minutes, and has mentored 30+ aspiring developers. Currently building C#/.NET systems for production business software; open to remote and international opportunities.

TECHNICAL SKILLS

Programming Languages: Java, C#, SQL; Kotlin and Python (project-level)
Backend Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Spring Validation, .NET, Entity Framework Core; Eureka and OpenFeign (project-level)
Databases: MySQL, PostgreSQL, H2, Liquibase; schema design, query optimization
API Development & Architecture: RESTful API design, OpenAPI (Swagger), JWT Authentication, Role-based Authorization, API Contract Design, Layered Architecture; Microservices
DevOps & Infrastructure: Docker, Docker Compose, CI/CD (GitHub Actions), Linux, Nginx, VPS deployment, Windows IIS
Testing & Tools: JUnit 5, Mockito, Postman, Git, GitHub, Maven, Gradle
Engineering Practices: OOP, SOLID, Design Patterns, Code Review, Technical Mentoring
Working Knowledge: Kafka, RabbitMQ, Redis, Kubernetes

PROFESSIONAL EXPERIENCE

Software Engineer | Full-time
Əminlər MMC, Baku, Azerbaijan | Sep 2026 – Present

- Develop and maintain C#/.NET backend services and RESTful APIs powering production business software.
- Diagnose production incidents and optimize data-access and query performance on live systems.
- Deliver backend changes and validate behavior post-deployment to ensure stable releases.

DevOps Engineer | Freelance, Remote
QRAVAN LLC, Baku, Azerbaijan | Jan 2026 – Aug 2026

- Containerized four backend services of a QR-based discount and cashback platform with Docker Compose, cutting local environment setup from about 1 day to under 1 hour.
- Built and maintained CI/CD pipelines, reducing deployment time by about 80% (from about 10 to 2 minutes).

Software Engineer | Part-time, Remote
OTOGO LLC, Baku, Azerbaijan | Jun 2025 – Jul 2026

- Designed and delivered 20+ REST API endpoints (Java, Spring Boot, MySQL) for provider onboarding, service listings and booking on a B2B car-service marketplace serving web and mobile clients.
- Defined API contracts with frontend engineers up front, surfacing integration issues before release.
- Owned the Docker-based deployment workflow end to end.

Software Engineer | Part-time, Hybrid
Desinftec LLC, Baku, Azerbaijan | Jul 2025 – Jun 2026

- Implemented JWT authentication and role-based authorization with Spring Security, securing production APIs for 500+ users.

- Optimized Hibernate data access and queries, reducing average API response time by about 30%.
- Structured a microservice-oriented architecture to simplify scaling and deployments.

Backend Developer | Part-time, Hybrid
Developia Engineering Academy, Baku, Azerbaijan | Jan 2025 – May 2026

- Built backend services for an educational platform serving 200+ students, delivering 15+ Spring Boot REST endpoints and reusable backend components.

Advanced Java Mentor | Part-time
Developia Engineering Academy, Baku, Azerbaijan | Aug 2024 – Jan 2025

- Mentored junior developers in advanced Java and Spring Boot through hands-on implementation guidance, debugging and code review.

Backend Mentor | Part-time, Hybrid
Design and Information Technologies Club, Baku, Azerbaijan | Oct 2023 – Jul 2024

- Mentored 30+ students in Java and Spring Boot through code reviews and technical sessions.
- Achieved an approximately 85% program completion rate among mentees.

SELECTED PROJECTS

AzConPrice | Production | Java, Spring Boot, SQL | Sep 2025 – Dec 2025 | azconprice.az

- Built the backend for price calculation and supplier/user data on a relational model, ensuring calculated prices stayed consistent with stored data.

Eracon | Production, internal system for a construction company | Java, Spring Boot, SQL | Jul 2025 | era-con.az

- Designed the database schema, then built and deployed the backend to production in about one week.

Karier | In development | Java, Spring Boot, MySQL | karier.az

- Developing REST services for accounts, job listings and applications, along with the deployment setup.

QR Avan | Production | Docker, Docker Compose, GitHub Actions, Linux, Nginx | Jan 2026 – Aug 2026

- Containerized and configured six backend services using Docker and Docker Compose, reducing environment setup time approximately one day to under one hour. Automated deployment workflows with GitHub Actions, reducing release time from approximately 10 minutes to 2 minutes

Alfred | Personal | Python, Paramiko, SQLAlchemy, MySQL

- Built a Telegram-based Linux server management tool over SSH, featuring monitoring, confirmation-gated Docker actions, and Git/image deployments with a rollback script.

EDUCATION

M.Sc. Cryptography | 2026 – 2028 (In Progress)
Azerbaijan Technical University, Baku, Azerbaijan

B.Sc. Computer Science | 2022 – 2026 (Graduated)
Khazar University, Baku, Azerbaijan

CERTIFICATIONS

- Backend Development, Developia Engineering Academy
- Java Programming, Intern Intelligence
- Java (Basic) and SQL (Basic), HackerRank
